

Skies Over Siberia

Posted By: BannSidhe

Post Date: February 17, 1999

Okay boys and girls, once again our friendly neighborhood BannSidhe is the General of the Army. It has taken me time, perseverance, some luck and several wins; but here I am. How did I get to this point you ask? Well, it seems I am generous tonight so I will tell you.

Skies Over Siberia: This is an Allied strategy that forces a stall or outright win over the Japanese in Asia. You must decide which of two versions you will use.

Method One:

Russia 1 - Okay I will start with the aggressive mode. Russia attacks Manchuria. If there are no Japanese build troops there you attack with no extra fighters. If there is one build unit there you attack with fighter extra. If there is 2 extra you use the fighter and a quick prayer or you opt for the defensive mode of this strat. After the battle you move the 2 inf from evenki to Yakut. If there is a ftr you place it in Yakut as well. Move the AA gun to evenki from russia.

UK 1 - The UK attacks kwangtung from india supported by the ftr. After taking kwang you land the ftr in yakut or china depending on Japan strength in FIC and your amount of cajones. Land the bomber and any ftrs you can spare in Russia.

USA 1 - If the sub in Hawaii survives the jap attack there you use it to hit any vulnerable transports that are in or around the sea of japan. More than likely 2 US troops and the ftr will survive the jap counter offensive attack any group of two or fewer infantry of japan if there are any in FIC or India. Land the bomber in russia, and the ftr in yakut.

Russia 2 - Retake Manchuria with the troops in yakut and the fighter. Build 3 inf in russia. By this time you should get the idea. ATTACK ALL JAPANESE TRANSPORTS AND ANY TROOPS IN ASIA Until you cant attack anymore.

Method Two:

The only difference between this and the above is that you don't attack Manchuria and Kwangtung. You instead migrate planes and inf and AA gun to yakut every turn for the first 3 turns to defend Yakut and keep the japs pinned in southern asia. You still attack trannies wherever possible. This method is necessary when you feel you cant take Manchuria or you just gotta hit the germans in Egypt.

You delay the japs long enuff to get the usa and uk ferries to Europe going and then drive the japs bak in Southern Asia. Okay yes there are counters to this as there are to every strat but I cant tell you all my secrets and still remain on top, now can I? Anyway Gradengko will soon be the GOA it seems as soon as he gets to 48 games. Well that is okay it gives me incentive to fight harder and keep winning. See you guys on the battlefield and I expect to see Skies Over Siberia being run to Perfection. General of the Army BannSidhe signing off.
